

FSG Pricing Optimization

Problem Landscape	Identified Problems and Proposed Solutions	Project Artifacts
Utilize Message Qu...	<p>Problem: Lack of Productionalization</p> <p>While I am not sure productionalizationisaword, I am sure that the Pricing process lacks it. This is simply an issue of associates needing functionality, them creating it and then it not being saved elsewhere. That is, if the 8th floor of Centennial were to disappear entirely, the solutions the pricing team has implemented would not be saved. From the perspective of a business this large, this should not be happening if at all possible. Although it is unlikely that anything happens to the pricers™ computers, it is better to be safe than sorry</p>
